Vishal Chincholi

Software Engineer 3 - Frontend(React) | Bengaluru, Karnataka, India

vishalsc1999@gmail.com | +91-7829361954 | LinkedIn | GitHub | LeetCode

I'm a Frontend Engineer with over 5 years of full-time experience. I have a solid background in developing responsive web apps using React and Next.js. I've had the opportunity to work in both product-based companies and dynamic early-stage startups, giving me a rich and varied experience in designing and building User Interfaces.

Experience

WALMART | SOFTWARE ENGINEER III

October 2025 - Present | 1 year

- Integrated **secondary PIN authentication** into Walmart Pharmacy's redesigned dashboard and other pages. This protects patient's health information behind a second layer of security for every connected pharmacy users.
- Delivered a extension of **In-Store Account Creation** onboarding which lets customers who start setup with a store associate, finish their pharmacy account online and connect it without returning to the store.
- Developed **bulk HIPAA Authorization** for family accounts in Manage Permissions, so caregivers can authorize several family members in one step instead of filling you a separate form for each person.
- Efficiently managed critical **On-Call** responsibilities and optimised thresholds for some of the OpenObserve queries to reduce alert noise.

MOOLYA | FRONTEND DEVELOPER

CLIENT - MYNTRA

March 2024 - October 2025 | 1.7 years

- Architected and deployed a reusable **multi-tab seller onboarding form** capturing basic information, catalog data, warehouse logistics, banking credentials, and GST compliance details using Webpack Module Federation for scalable **microfrontend** integration.
- Developed a self-service **banner management system** for Partner Portal, eliminating email-based communications by enabling real-time banner deployment which is visible to all sellers nationwide directly within the application.
- Spearheaded the integration of ClearTax's automated e-invoicing solution into the Myntra Partner Portal, **significantly reducing the turnaround time for processing invoices from up to 30 days to near real-time**, enhancing operational efficiency and seller satisfaction.
- Efficiently managed critical **On-Call** responsibilities, swiftly resolving complex operational issues and ensuring seamless internal team operations.

SPYDRA | SOFTWARE ENGINEER - FRONTEND

October 2023 - January 2024 | 4 mos

- Developed a Next.JS UI application from scratch single-handedly for company's official website **spacematrix.com** (new design) that includes multilingual support.
- Made use of **GreenSock Animation Platform (GSAP)** and **Framer Motion** libraries to craft intricate animations and transitions, enhancing user interaction and visual appeal.

Skills

DSA/Programming:
• JavaScript
Web Development:
• HTML5 • CSS3 • JavaScript
• ES6+ • TypeScript • React.JS
• Next.JS • Node.JS • Express.JS
• MongoDB • MySQL • PostgreSQL
Architecture:
• Micro Frontend • Monolith
State Management:
• Context API • Redux
Version Control System:
• Git
Miscellaneous:
• Webpack • Axios • Docker
• React Router
Testing Libraries:
• Jest • Enzyme
• React Testing Library

Education

JSS SCIENCE AND TECHNOLOGICAL UNIVERSITY (FORMERLY SJCE)

B.E In Computer Science and Engineering

Mysuru, Karnataka, India

Cumulative GPA: 8.49/10.0
(For all 8 semesters)

Projects

EMPORIUM

E-commerce App using NextJS 13.

CHATSPLIT

Web app for real-time messaging functionality using NextJS 13.

Experience

KITABELI | WEB ENGINEER

August 2022 - October 2023 | 1.3 years

- Developed a **React.JS** application called **Inventory Management System** using React.JS and Material UI that simplifies the placement, updating, and tracking of purchase orders, resulting in improved efficiency.
- This app could also be used to monitor inbound and outbound orders, enhancing the company's ability to track shipments and transfers between kiosks.

RAKUTEN | ASSOCIATE SOFTWARE ENGINEER

July 2021 - June 2022 | 1 year

- Developed UI and charts for a **React.JS** application called **Energy Tracker** that stores and manages details of energy consumption across Rakuten offices worldwide.
- Served as an integral member of the core development team, troubleshooting and fixing bugs.

Internship

RAKUTEN | TECHNICAL INTERN

Feb 2021 - July 2021 | 6 mos

- Developed a React.JS application called **Athena** that is used to visualize team's activity in an organization (for managers).
- Developed UI Screens from scratch and added features like **Donut**, **Bar** and **Pie** charts along with end to end testing.
